

Crystal Melt & Pour

Innovative Soap Bases

Crystal Melt & Pour

Stephenson crystal soap bases are used by artisans and large scale manufacturers across the world to produce some of the most innovative and aesthetically pleasing soap bars on the market.

Ideal for the craft market, because it requires little in the way of specialist equipment, customers typically need only to add colour and fragrance to achieve fantastic finished soap bars. Our Melt and Pour soap bases are also popular with large scale, automated, manufacturers wanting to produce mass market innovative soap lines to differentiate themselves from their competition.

A multitude of melt and pour soap base varieties are available across transparent, translucent and opaque. Each specially formulated to meet specific market demands.

The range offers superior colour stability even when kept at high temperatures for extended periods and are perfect for slicing and moulding. So, whether your requirement is for a soap bar that is crystal clear, has low pH or is even certified to organic standards, we are sure to have a melt and pour base to meet your requirements. Accreditation to ISO9001 and ISO14001 ensure's quality production and service to the highest standards.

Our picture illustrates Grated ReBatch Base, we supply the base as a solid block in 9kg packaging.

Processing Crystal Melt & Pour

1. Open & Cut

Simply open the packaging, safely cut the Crystal soap base into smaller cubes, doing this will make the soap easier to handle and melt.

2. Melt

Gradually heat the soap base ensuring that the soap melts evenly and does not boil over.

3. Mix

Mix gently ensuring that any fragrance or additives* you have added are evenly distributed throughout the soap base.

**Use up to 2% additives*

4. Pour

Working quickly, simply pour your soap base into your soap mould.

Order yours today

Interested in Stephenson Crystal Melt & Pour soap bases?

www.botanicuniverse.com

Processing Crystal Rebatch

1. Open & Cut

Grate the rebatch base and place into slow cooker. We recommend using **at least 1kg**.

Turn on to high.

2. Melt

Cover the slow cooker for 45 minutes. Stir well and re-cover for a further 45 minutes until a mashed potato consistency is achieved.

Ensure temperature is between 73-75°C.

3. Add & Mix

You can add fragrance*, botanicals and colourants whilst still in the slow cooker.

**Use up to 3% additives*

4. Scoop & Set

Working quickly, scoop your melted Rebatch into the mould.

Be careful not to scrape the base as there will be a thin crust on the base off the slow cooker.
